

## LED Flush Light 9

This is a very popular style 9" flush mount light with integrated LED system based on Samsung LEDs.

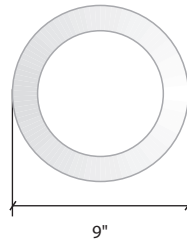

The product offers much higher light output than traditional flush mount with very low energy consumption as well as a very long life span. LEDs are rated for 50,000 hours.

Our studies have shown that a traditional 9 inch flush mount lamp equipped with single 40W leading brand light bulb gives the real output of about 200 lumens out of 40W. Our replacement product gives 470 lumens out of 9.5 W or 50 lumens per watt, which is 10 times more efficient.

CPFL9

LED   
9.5W = 60W

### Technical specification

Model	CPFL9
Casing colour	silver
Input voltage	110VAC
Power consumption	9.5W
Frequency	60Hz
Class of protection	II
Degree of protection	IP20
Dimensions	9*2 inches

### Optical parameters

Model	Lumens flux	Beam angle	Color temperature	CRI	Life span of the LED
CPFL9	470lm	120°	3000°K	+75	50000h
CPFL9	510lm	120°	4000°K	+75	50000h
